

Front-End Developer (AngularJS / JavaScript)

Wien, 30. April 2018

We are an Austrian Startup which operates internationally and provides software solutions for media companies (media agencies, marketers, creatives and more).

We have created an awesome product called danube which streamlines their business. Since our customer base is growing and expanding, we are looking for a Front-End Developer. Juniors are very welcome!

What you'll do

- Design and implement responsive and beautiful user-interfaces
- Perform application programming activities in the latest technologies: AngularJS, HTML5, CSS3, and more.
- Create comprehensive software-tests to ensure product stability
- Collaborate with Product Owners, Designers and other developers on different permutations to find the best solution possible.

What we are looking for

- Angular JS 1.x (and maybe Know-how in Angular v2+)
- Integration- and Unit-Testing with Protractor/Jasmine
- HTML5, JavaScript, Bootstrap 3+, CSS, Sass
- UI and UX Design
- Git
- IDE: IntelliJ IDEA (preferred) or Eclipse
- Agile methods (Scrum, Kanban)
- Experience with mobile application development (Android, iOS, Cordova, NativeScript or similar) is a plus

Basic Qualifications

- Interested in latest front end technologies and willingness to learn
- Some experience with responsive frontend web applications using HTML 5, CSS 3 and JavaScript
- Basic Core Java is a huge plus

What we offer

- Work in a small and agile team with the latest technologies
- Help us create the best solution for our customers in the media business
- Home Office is possible but we have our office in the 7th district, just sayin'
- We offer you at least 2.273,- € / 38,5h as stated in IT Kollektiv-Vertrag (01/2018) but based on your qualifications and experience we can agree to overpay.
